

CHALKIDIS THEODOROS

SOFTWARE ENGINEER

PROFESSIONAL EXPERIENCE

Software Engineer - Product Owner

Who Cares Software

 2026 - Currently  Contractor (Remote)

- Led design and development of a full-stack web and mobile application, delivering tailored solutions for client workflows
- Defined system architecture and technology strategy across frontend, backend, and mobile platforms
- Owned client discovery, MVP planning, feature prioritization, and technical decision-making

Software Engineer

Alpha Omega Zed

 2023 - 2026  Heraklion, Greece (Hybrid)

- Led development of digitization platforms transforming unstructured documents into structured data using OCR and NLP
- Architected scalable distributed web systems with microservice-based design, enabling processing of petabyte-scale datasets
- Built reusable frontend infrastructure and automated page-generation templates, accelerating development velocity
- Drove MVP scoping vs. roadmap planning, led B2B POC design

Junior Software Engineer

Ballista, Carrera Group, Inc.

 2022 - 2023  Remote

- Contributed to the development of a Scala-based transpiler for Clinical Query Language (CQL)
- Designed parsing and transformation logic of the transpilation pipeline

EDUCATION

Master of Science

University of Crete Computer Science Department

 02/2024 - 02/2026  Heraklion, Greece

- Major: Software Engineering and Programming Languages
- Minor: High Performance Distributed Systems
- CGPA 9.3/10

Bachelor of Science

University of Crete Computer Science Department

 09/2019 - 06/2023  Heraklion, Greece

- Specialization: Software Engineering and Programming Languages
- CGPA 8.05/10

PROJECTS

Gahenn-Plains

a configurable solar system simulation in Unity, implementing custom physics logic for orbital mechanics, system scaling, and real-time visualization.

Alpha Language Compiler and Virtual Machine

Javascript like programming language with garbage collection developed in C, using YACC and LEX.

SKILLS

Programming Languages

JavaScript	TypeScript	Go	Python
C	C++	Scala	SQL
			Bash

Frameworks & Technologies

React	Node	Docker	Express
Unity	OpenMP	MPI	React Native

Cloud & DevOps

Github	Jira	CI/CD	AWS
REST APIs	GCP		

Systems & Workflows

Microservices	UNIX / Linux	CLI tools
Agile / Scrum	Distributed Systems	

OTHER QUALIFICATIONS

Languages

- Greek (native)
- English (Michigan ECPE)

Interests

- Playing music
- Hobby game dev projects

Teaching Assistant

Courses:

- Programming Languages and Compilers
- Design Patterns
- Game Development

CORE EXPERTISE

- Full Stack Development
- Distributed Systems
- Microservice Architecture
- Cloud Infrastructure
- High-Performance Computing
- Graphics Programming
- Compiler Construction
